

Mystic Boot & High Shoe

- Clean Instep
- 3x GBS
- PU Covered Seams
- Split Toe Inside
- Heel Stabilizer
- Duragrip Sole
- 5mm SkyFlex

More details

- One piece sole. As thin as possible to get the most feeling of the board. PU material is durable.
- The Covered Dry seams – each seam is covered by strong PU – if you want to put it on or take it off very fast it won't break – very strong boot.
- Instead of velcro strap there is a PU material. More flexible and steady stands. Strap is not comfortable.
- Because the seams are covered the boot is completely waterproof.
- When you put the wetsuit on top no water will penetrate.
- Split toe is very very important on this boot. The split toe is on the inside of the boot, since if on the outside it's too much material which makes it uncomfortable.

Duragrip Sole

duragrip SOLE

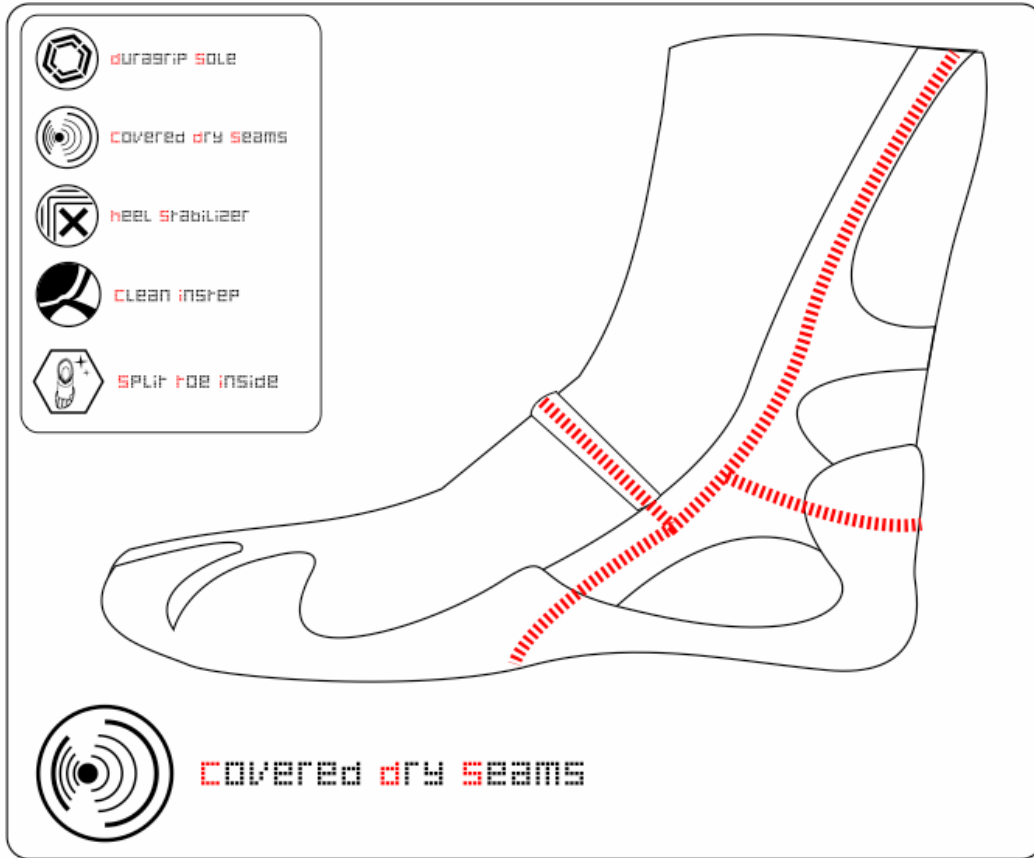

- COVERED dry SEAMS**
- HEEL STABILIZER**
